

Diablo MONSTER THRIVE

0-2-1 PRECISE B VITAMIN

Using cold pressed kelp as natural source of many nutrients blended with bio compounds, humates, vitamins and a specific B complex, **Thrive** is the perfect tonic and additive to add to your nutrient mix.

Monster Thrive will help build cellular structure, restore and rebuild sturdy growth and robust floral plants.

Monster Thrive is particularly helpful during transplant and stimulates all phases of growth from seedling and clones to strong vegetative growth and up to the ultimate flower cycle boost from weeks 1 to 5.

Monster Thrive prevents transplant shock, stimulates new growth and is a "must have" for all medical cannabis growing programs.

Thrive is usually used as a drench but can also be applied as a foliar application.

- Excellent root builder on new clones, cuttings and seedlings.
- Natural source of B Vitamin.
- Great for cloning and transplanting.
- Sturdier stem, petioles, leaves and flower bud sites.
- Highly concentrated and metabolic booster.
- A reliever of stress on plants grown in an aggressive program.
- Extra nutrition for the photosynthetic process.
- Targets cellular reproduction during a focused growth or flowering cycle.
- Promotes rapid shoot and flower formation.
- Ensures micro and trace minerals are available anytime.
- A weekly boost!

* Available in 1L, 4L, 10L & 20L sizes.
